REVENUE OPERATIONS

One connected *revenue system.*

Strategy, CRM data, pipeline and forecasting feed one place where decisions are made, with a person accountable for each one.

Strategy decides *what the CRM must know.*

Each go-to-market choice becomes a field, a rule and a segment. If it isn't captured in the data, it can't be managed.

A · GO-TO-MARKET DECISIONS

A1
Ideal customer profile
Which accounts we want

A2
Segments & tiers
How we group and prioritise them

A3
Territories & coverage
Who owns which accounts

A4
Sales motion
Direct or partner-led

B · CRM ACCOUNT RECORD

ICP fit score	0-100
Segment	picklist
Tier	A · B · C
Territory	region code
Account owner	assignment rule
Coverage model	direct · partner

C · RESULTING SEGMENTS

Enterprise
12 accounts

Mid-market
28 accounts

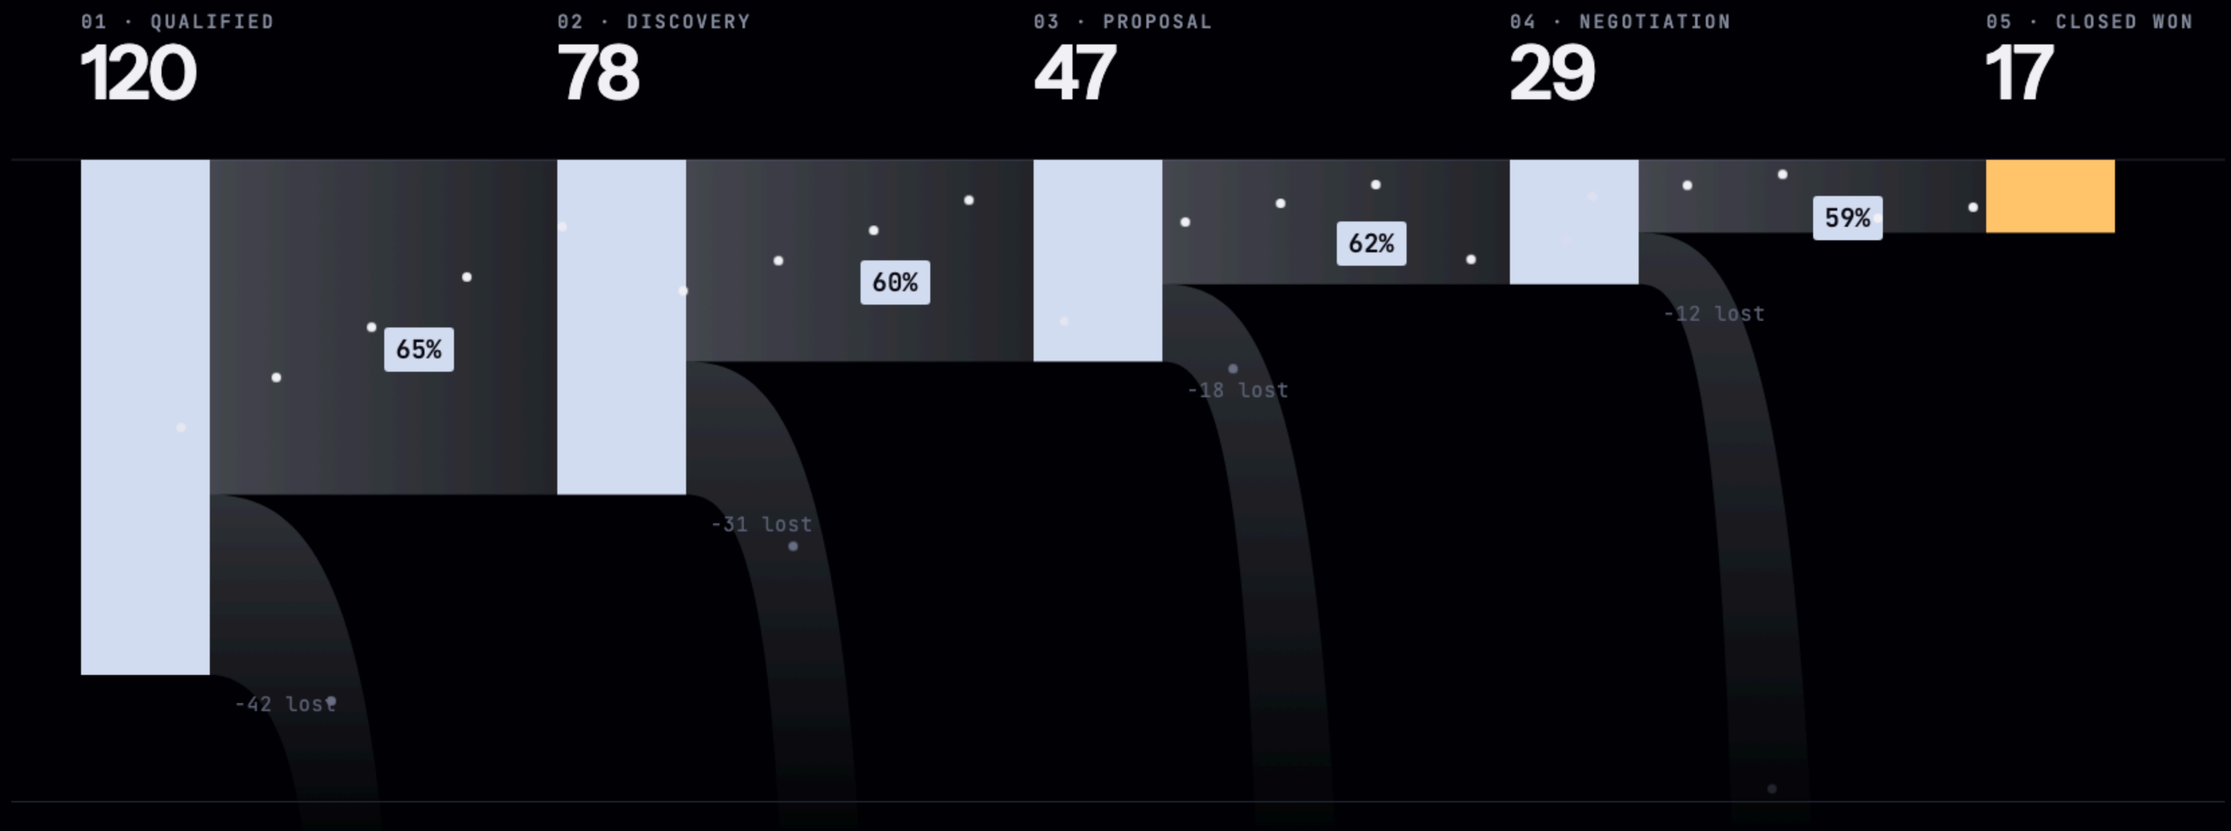

Partner-led
20 accounts

ILLUSTRATIVE ACCOUNTS

Pipeline is a *flow*, not a list.

One illustrative quarter: how 120 qualified opportunities move, and leak, stage by stage.

ILLUSTRATIVE DATA · NOT ACTUAL PERFORMANCE

WIN RATE FROM QUALIFIED
14% 17 of 120

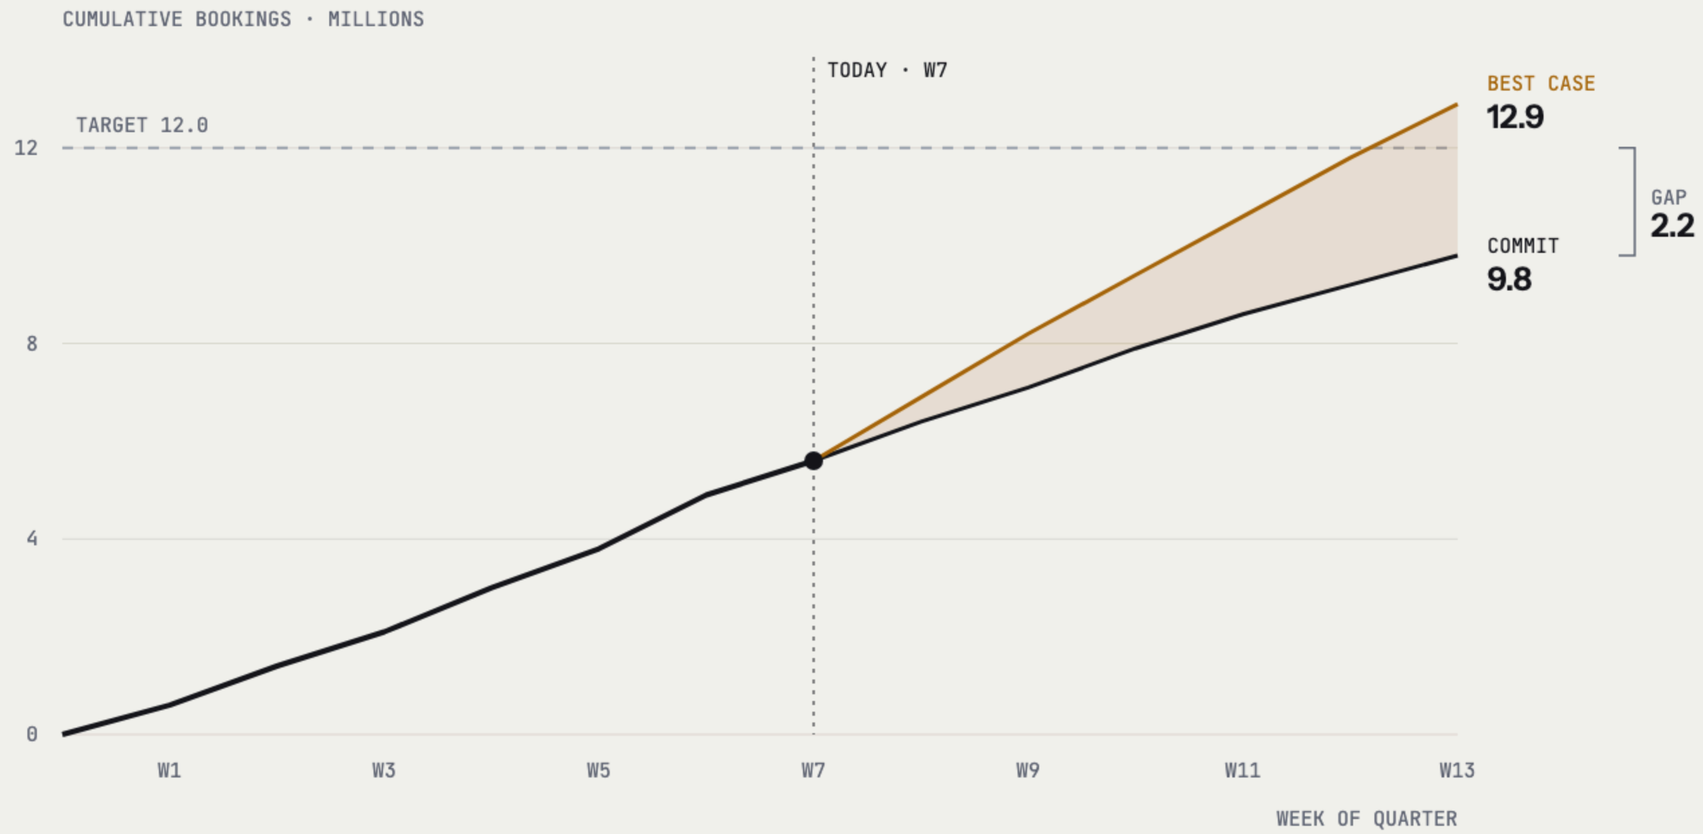

AVERAGE SALES CYCLE
70 days

PIPELINE COVERAGE
3.2× of remaining target

Every figure on this slide is illustrative. It shows how the metrics relate to each other, not any company's results.

A forecast is a *range* you manage.

Commit is what owners expect to close with high confidence. Best case adds upside deals that could still land.

COMMIT

Deals the owner expects to close this quarter with high confidence.

BEST CASE

Commit plus upside deals that could close if they progress.

TARGET · GAP

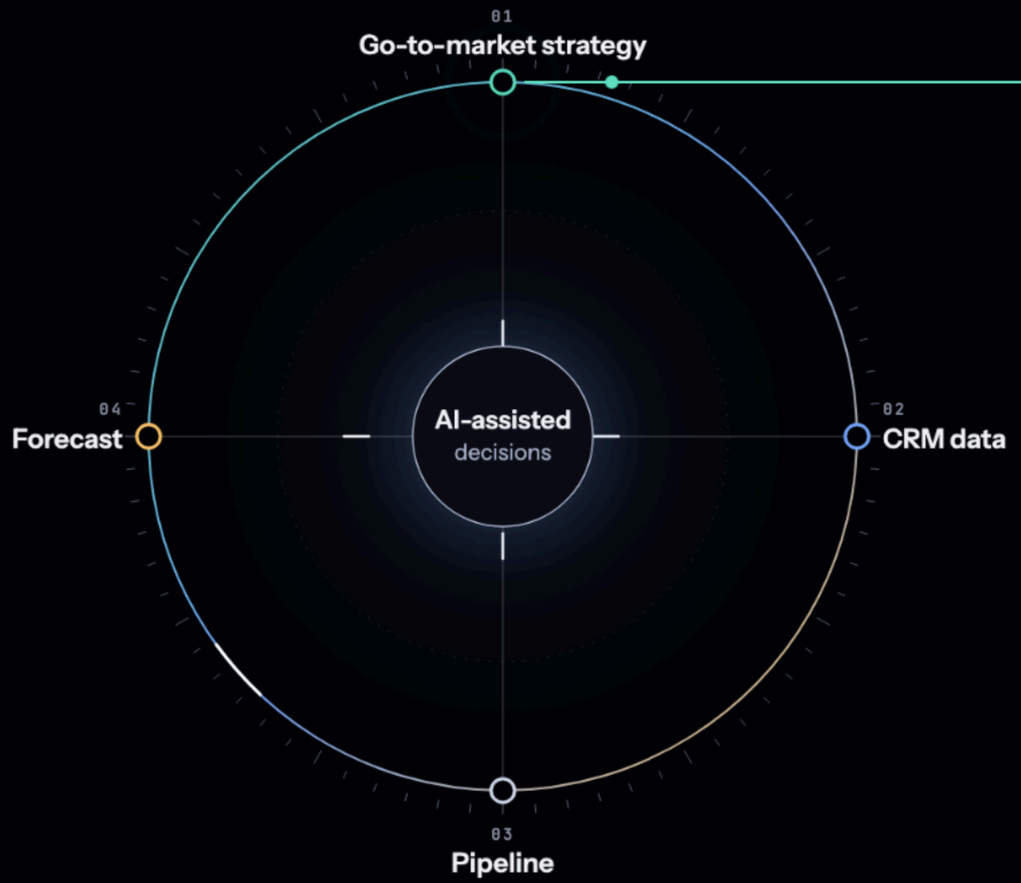

The gap is what commit still lacks against target: pipeline to create, accelerate or recover.

ILLUSTRATIVE DATA

Values in millions for a fictional quarter. They do not represent actual results or forecasts.

AI recommends. *People decide.*

Each recommendation arrives with its evidence. An accountable owner approves, adjusts or rejects it, and every outcome feeds back into strategy.

01 · SIGNALS

Pipeline, forecast and account changes

02 · AI RECOMMENDATION

A suggested action, with its evidence

```
Prioritise 6 proposal-stage deals stalled >30 days
Evidence: stage history, activity gaps · Confidence: medium
```

03 · HUMAN APPROVAL

An accountable owner decides

Approve | Adjust | Reject

04 · ACTION & OUTCOME

Logged in CRM and measured against the KPI

PRINCIPLE No automated change to customers, prices or the forecast without an owner's approval.

EXAMPLE RECOMMENDATION IS ILLUSTRATIVE
